SUMMARY OF INFORMATION

The target is a gray, smooth, metal container 3-5 ft long, 2-3 ft wide. The box has a dense, solid protective inner lining (2-3 inches thick) that affords some sort of protection: ie. either as a shock absorber or to provide flotation or something. The box has a double latch system. The box is partially sticking out of the ground as if it had impacted or was sloppily buried in sandy soil. The area immediately around the box is flat with prickly, scrubby vegetation, that is less than 8-10 feet high and has lots of gaps in between. In the immediate vicinity is an area of shallow, brackish water with mosquito larvae in it. The air is still and hot.

The box contains something that has been compressed then wrapped.

There is the feeling that this island could be easily walked in a day.

The location of the box on the grid representation of the island is in the vicinity of the four way juncture of F5, G5, F6 and G6.
